Abstract:

See below. Determination available in abstract form only. Included under "Letter" field to facilitate database word searching.

Letter:

Is the spraying of asbestos containing materials used for insulating or fireproofing buildings, structures, pipes and conduits, if the pollutant would not be expelled to the outside atmosphere, covered under NESHAPs?

Although asbestos is not directly emitted to the air from these operations, there is a potential emission with future demolition. It was decided to cover these operations to reduce this potential.
