

COV-19 Announcement

We are taking several precautions to protect our clients in response to COV-19 **to include offering of on-line training.**

As you may know the Ohio EPA and Ohio Department of Health allow you to apply for re-certification with the state, even though your training certification may not be up to date. This allows all of us to evaluate better when it is safe to resume business in a more normal manner. At the present time Ohio Department of Health allows waiver training through June 30, 2020.

We will continue to offer courses at our training center but are limiting the number of participants at any one time to allow needed distance. To accommodate the need for training, we are increasing the number of course offerings at least through June. In addition, we are taking added steps to disinfect work surfaces between classes.

We also will screen participants so that anyone reporting symptoms of the virus or having exposure to someone with the virus cannot attend our courses.

If you are uneasy with these precautions and still wish to have training, we are offering on-line training in addition to our normal course offerings. Please call us for details. These courses will be offered by way of Zoom. If you take our course on-line, you will need to take an examination and have your photo taken at our facility within 30 days to receive a certificate of training.
