Abstract:

See below. Determination available in abstract form only. Included under "Letter" field to facilitate database word searching.

Letter:

Is the "manufacture" of shot gun shells subject to the asbestos regulations, if no commercial asbestos is used at the facility?

Although manufacturing of shot gun shells is specifically listed under the emission standard in Section 61.22(c), the Remington facility is not subject to the regulations because no commercial asbestos is used at the facility. This facility assembles the shells using a wad of asbestos, but the wads are produced from commercial asbestos at another Remington facility.
