61.22(j)
61.25

Abstract:

See below. Determination available in abstract form only. Included under "Letter" field to facilitate database word searching.

Letter:

1. Do the requirements for waste disposal sites apply to an asbestos settling pond that has a useful life a twenty years?

2. Do they apply to a settling pond that is used for temporary storage of asbestos waste before it is transferred to a landfill?

1. The settling pond is considered an active waste disposal site and must meet the requirements of Section 61.25. That Section prohibits visible emissions from the disposal site and requires that warning signs and fencing be installed.

2. In this case, the landfill is considered the waste disposal site and is required to comply with Section 61.25. The settling pond is subject to the requirements of Section 61.22(j) which govern interim steps in the collection of asbestos - containing wastes prior to deposition at an acceptable waste disposal site.
